

Coloration of regrind:

**A superior solution making
upcycling come true**

working for you.

SunChemical®

a member of the DIC group

Color & Comfort

The best of color & additive solutions

- Flexibly applicable masterbatch combining color & additives for easy one-step dosing
- Brilliant, economical coloring of regrind material
- Specialized additives for
 - Reliable stabilization & valorization
 - Less degradation during processing
 - Longer protection of mechanical properties

Our masterbatch solution...

... allows a higher regrind content even for demanding applications

.. enhances the quality level comparable to the use of virgin material

... facilitates real upcycling & closing of the loops

Benefit from our long-term experience in coloring regrind material, esp. PE & PP!

Extracting the maximum value from products – over and over again

Going along with the concept of “Circular Economy” which aims to keep products and materials at all times at their highest utility and value, our masterbatches turn waste into resources by using natural loops.

With our Sicolen® products we enable recovery and regeneration of polyolefin products and materials at the end of their service lives. Coloring regrind with the established masterbatches results in the same level of quality as when using new material.

Sicolen® masterbatches for coloring polyolefin regrind offer the following benefits:

- Brilliant, economical coloring of regrind material
- Allowing an outstanding regrind content even for demanding applications
- Sovereign protection of mechanical properties from degradation during processing
- Enhancing a quality level comparable to the use of virgin material

As a result, our masterbatches can advance the effectiveness of products and solutions and make a vital contribution to a sustainable future. They are not only suitable for coloring regrind used for crates or waste bins but also for other upscale applications
